By Rugged CCTV

## Digital Split Screen Manager

This revolutionary Digital Split Screen Manager beats all the other Quad Processors you've ever seen – hands down! Why? Because it does so much more.

The Digital Split Screen Manager supplies high quality monitoring and recording by connection up to 4 cameras at the same time. As digital process is applied, it performs the cost-effective system configuration.

This VGA Quad processor has typical Quad processor function such as full screen, Quadrant screen and auto switching mode.

Unlike ordinary video processor, this product has a VGA output to utilize full quality of LCD display.
